

Reno A & E HM Series

Three Detector Motherboard For Reno A&E Model H Series Detectors

Description:

The HM Series motherboards are configured to connect up to 3 Model H-12-F single channel, 12 VDC, vehicle detectors from Reno A&E. A sturdy aluminum mounting plate ensures a very secure, clean, and easy installation. Two heavy-duty terminal strips provide access to the power input, loop inputs, and relay outputs (AC units only). Configurations available: 24 VAC, 120 VAC, 12 VDC, 24 VDC.

** Specifications are subject to change to reflect improvements and upgrades.
